

Cell Model/Poster Proposal

You are to write a proposal for your Cell Model/Poster project. Listed below are the requirements for your proposal.

If you're working on a MODEL WITH A PARTNER (or by yourself), you need to explain the following in your proposal:

- Your names
- Whether you will be doing an animal or a plant cell
- What you will be comparing your cell to
 - With a list of organelle comparisons
- What materials you will be using to represent each part of your model
- Distribution of work
 - EXACTLY what each person will do
- Proposed DEADLINES you have set for yourself
 - i.e. when you and your partner plan to have certain things done
- Blueprint or sketch of your model with labels representing what each organelle will be made of

If you're working on a POSTER BY YOURSELF, you need to explain the following in your proposal:

- Your names
- Whether you will be doing an animal or a plant cell
- What you will be comparing your cell to
 - With a list of organelle comparisons
- What materials you will be using to represent each part of your model
- Plan of action (how you intend to go about creating your poster)
- Proposed DEADLINES you have set for yourself
 - i.e. when you and your partner plan to have certain things done
- Blueprint or sketch of your model with labels representing what each organelle will be made of
